Say NO to the Power Line!

Petition: We the undersigned OPPOSE PATH!

We join in opposition to the Allegheny Power and American Electric proposal to build the proposed high voltage transmission line through our communities known as **PATH** (Potomac Appalachian Transmission Highline). These 765-kilovolt lines are being constructed to supply power beyond the borders of West Virginia, while requiring us to pay for it. Our opposition is based on the negative impact to our quality of life that includes: safety risks, health concerns, environmental damage, higher electrical costs, and deterioration of property values. The PATH line is a 50-year commitment to increased pollution from coal-fired power plants and would undercut efforts to produce energy from cleaner, greener, renewable sources. **We believe it is a serious abuse** of the State's power to use **EMINENT DOMAIN** to take our land to build a "for-profit" power line that will mutilate our landscape without providing any benefit to our communities.
